Daily Deals From a Nerd Mom

NuvoCig is a high-end electronic cigarette company that offers revolutionary vaping products and accessories. We were able to test out the **Deluxe Kit** and was also surprised with the **Ultimate Battery** to go along with it.

*“ Different people use different devices and/or methods to stop smoking. **NuvoCig** is meant to be an alternative to traditional smoking, not necessarily a smoking cessation device. However, many people have used it and electronic smoking to aid in their efforts to stop smoking. We do supply electronic cigarette cartomizers with staggered levels of nicotine, including non-nicotine, so that users have the opportunity to remove their nicotine intake completely while satisfying the other habitual desires of smoking. Please keep in mind that **NuvoCig** has not been laboratory tested to be qualified as a smoking cessation device. ~Nuvocig website*

The **Deluxe Kit** (\$59.99) that we were sent comes with everything to help you get started including some extras:

- **1 pack of e-cigarette cartomizers** (5 electronic cigarette cartomizers per pack) You choose the Flavor and the Strength. *We chose Apple (High), Tobacco (Medium), Peach (High), Pina Colada (High) and Whiskey (High).*
- **2 standard e-cigarette batteries**
- **USB e-cigarette charger**
- **Nuvo e-cigarette Wall Charger**

All of this comes together in a nice sturdy box so you can keep all of your accessories in one place.

The **USB charger** is great for plugging into your computer to charge or even your cell phone for on-the-go charging. I was very happy with the strength of the vapor hit as well as the flavors. The hubs enjoyed them as well, especially the Whiskey flavor. I also like the fact that you get 2 standard batteries so that one can be charging while you enjoy the other. No more waiting for it to charge!

There are **5 levels of nicotine strength** in Nuvo e-cigarette cartomizers: **Super High** (36mg of nicotine), **High** (24mg of nicotine), **Medium** (18mg), **Light** (12mg) and **Non-Nicotine** (0mg). For reference, a **High** e-cigarette cartomizer gives about the same amount of nicotine as a regular cigarette, and contains almost as much nicotine as found in a regular pack of cigarettes. *Each flavor has it's own set of strengths to choose from.*

NuvoCig Ultimate Battery (\$32.99):

With **1000 mAh, 4.2 volts**, this means a more powerful vapor hit and much longer periods between charging. This battery lasts much longer than the standard e-cig batteries! The cartomizers twist onto the top of it and then you screw on the cartomizer cap over it. Pretty stylish looking! The **Ultimate Battery** also has a **5push safety feature** that I love. This means you don't have to worry about accidentally pushing the button when not in use. Just push the button 5 times until it blinks and it's locked until you push it 5 times again. Each battery comes with its own USB Charger.
